Sunshine Mix # 1 / LC1

Mix #1 is, by far, the most versatile formulation expert growers choose for the production of a wide variety of crops.

Ingredients: Canadian Sphagnum peat moss, coarse perlite, starter nutrient charge (with gypsum), dolomitic limestone and a long-lasting wetting agent.

WHM #	Description	1-53	#/Pallet
SSLC13	Mix LC1 - 2.8 cf loosefill	\$ 12.80	54
1-29			
SS1B38	Mix #1 - 3.8 cf bale	\$ 26.46	30

Sunshine Mix # 2 / LB2

Mix #2 is appropriate for the same general uses as Mix #1, but no nutrient charge has been added, allowing you to have complete control over fertilization.

Ingredients: Canadian Sphagnum peat moss, coarse perlite, gypsum, dolomitic limestone and a long-lasting wetting agent.

WHM #	Description	1-53	#/Pallet
SSLB23	Mix LB2 - 2.8 cf loosefill	\$ 12.80	54
1-29			
SS2B38	Mix #2 - 3.8 cf bale	\$ 26.46	30

Sunshine Mix # 3 / LG3

Mix #3 is designed for germinating seeds and other propagation applications. It has a specifically screened shorter fiber peat, and a low fertilizer charge to protect seedlings and plugs.

Ingredients: Fine Canadian Sphagnum peat moss, vermiculite, low nutrient charge (with gypsum), dolomitic limestone and a long-lasting wetting agent.

WHM #	Description	1-53	#/Pallet
SSLG33	Mix LG3 - 2.8 cf loosefill	\$ 15.19	54
1-29			
SS3B38	Mix #3- 3.8 cf bale	\$ 31.27	30

Sunshine Mix # 4 / LA4

Mix #4 is recommended where high air capacity and fast drainage are needed: during winter months, with water and salt sensitive crops, or where frequent leaching is required.

Ingredients: Canadian Sphagnum peat moss, coarse perlite, starter nutrient charge (with gypsum), dolomitic limestone and a long-lasting wetting agent.

WHM #	Description	1-53	#/Pallet
SSLA43	Mix LA4 - 2.8 cf loosefill	\$ 13.82	54
1-29			
SS4B38	Mix #4 - 3.8 cf bale	\$ 28.58	30

Sunshine Mix # 5 / LP5

Mix #5 is designed to promote better root development in ornamental and vegetable transplant plugs.

Ingredients: Canadian Sphagnum peat moss, fine perlite, low nutrient charge (with gypsum), dolomitic limestone and a long-lasting wetting agent.

WHM #	Description	1-53	#/Pallet
SSLP53	Mix LP5 - 2.8 cf loosefill	\$ 14.52	54
1-29			
SS5B38	Mix #5 - 3.8 cf bale	\$ 29.58	30

Sunshine Mix # 6 / LPM6

For those who mix your own, Mix #6 contains no aggregate, allowing you to control drainage by choosing your own aggregate (e.g. pumice or bark).

Ingredients: Canadian Sphagnum peat moss, nutrient charge (with gypsum), dolomitic limestone and a long-lasting wetting agent.

(contains twice the fertilizer charge and gypsum as Mix #1)

WHM #	Description	1-53	#/Pallet
SSLPM63	Mix LPM6 - 2.8 cf loosefill	\$ 10.88	54
1-29			
SS6B38	Mix #6 - 3.8 cf bale	\$ 19.85	30

Sunshine Mix # 7 / LGP7

Polymer Gel holds available water near the roots, making it an excellent mix for plants needing frequent watering or receive less than ideal care once they leave the greenhouse.

Ingredients: Canadian Sphagnum peat moss, coarse perlite, starter nutrient charge (with gypsum), dolomitic limestone and a long-lasting wetting agent, super absorbent polymer.

WHM #	Description	1-53	#/Pallet
SSLGP73	Mix LGP7 - 2.8 cf loosefill	\$ 15.85	54
1-29			
SS7B38	Mix #7 - 3.8 cf bale	\$ 33.02	30

Sunshine Mix # 8 / LC8

Mix #8 is an all-purpose mix with vermiculite and perlite which makes it suitable for a variety of plants.

Ingredients: Canadian Sphagnum peat moss, coarse perlite and vermiculite, starter nutrient charge (with gypsum), dolomitic limestone and a long-lasting wetting agent.

WHM #	Description	1-53	#/Pallet
SSLC83	Mix LC8 - 2.8 cf loosefill	\$ 12.80	54
1-29			
SS8B38	Mix #8 - 3.8 cf bale	\$ 26.46	30

Sunshine Mix # 15 / LC15

Mix #15 is a multi-purpose formulation expert growers select for the production of a wide variety of crops.

Ingredients: Canadian Sphagnum peat moss, coarse perlite, starter nutrient charge (with gypsum), dolomitic limestone and a long-lasting wetting agent.

WHM #	Description	1-29	#/Pallet
SS15B38	Mix #15 - 3.8 cf bale	\$ 24.32	30

SUNSHINE.

Sunshine MVP

(formerly Metro-Mix 200)

Excellent for propagation and growing-on. Outstanding for bedding plants, smaller potted plants & hanging baskets.

Ingredients: Vermiculite, Canadian Sphagnum peat moss, coarse perlite, starter nutrient charge (with gypsum), dolomitic limestone and a long-lasting wetting agent.

WHM #	Description	1-53	#/Pallet
SSMVP	MVP - 2.8 cf loosefill	\$ 17.27	54

Sunshine VP

(formerly Metro-Mix 250)

Sunshine VP contains bark ash and can be used for similar crops as Sunshine MVP.

Ingredients: Canadian Sphagnum peat moss, vermiculite, coarse perlite, starter nutrient charge (with gypsum), dolomitic limestone and a long-lasting wetting agent.

WHM #	Description	1-53	#/Pallet

Ingredients: Pine bark and Canadian Sphagnum peat moss, composted peanut hulls, vermiculite, starter nutrient charge (with Gypsum) and slow release nitrogen, dolomitic limestone and a long lasting wetting agent.

WHM #	Description	1-39	#/Pallet
5MHPM	MM HPM - 2.8 cf Loose	\$ 14.13	40

Fafard routinely provides a balanced water soluble nutrient starter charge to all of its standard mixes. The nutrient starter charge provides a dilute, balanced, nutritional environment for seed germination and early seedling growth. In the peat-based media, the starter charge provides sufficient fertility for 7-14 days. However, Fafard recommends a grower application of a dilute, complete fertilizer at 50-100 ppm at wet down or immediately after plant germination or transplanting.

Fafard Growing Mixes - 3.8 cft bales

Growing Mix #1

A medium texture, economical media.

Ingredients: Peat Moss, Starter Nutrients and a Wetting agent.
